

PROTECTIVE STRAP

ABSTRACT OF THE DISCLOSURE

A protective strap for spirally winding around a handle includes a main body
5 and a distinctive strap. The main body is an elongated strap member having two lateral
edges, two end edges, a top side and a bottom side. The two lateral edges of the main
body are respectively longer in length than the two end edges of the main body. The
distinctive strap is disposed on the top side of the main body, having two lateral fringes
and two end fringes shorter in length than the two lateral fringes. The distinctive strap is
10 parallel to one of the lateral edges of the main body and has a width between the two
lateral fringes thereof smaller than that between two lateral edges of the main body.
